SUPPLEMENTAL DETAILED ACTION

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee. Authorization for this examiner's amendment was given in a telephone interview with Applicant's Representative: Eric Cernyar on September 2, 2005.

The claims are amended as the following:

For the independent claim 20, on page 9 of 21 of the document dated 3/15/05,

replace: "~~A method~~" to "A computer implemented method"

For the independent claim 22, on page 11 of 21, first sentence,

replace: "~~drill-down-report-specifying metadata~~" to "a drill-down-report linking identifier"

For the independent claim 22, on page 11 of 21, at the second sentence,

replace: "metadata" to "linking identifier"

Reasons for allowance

The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach the combination of limitations in the independent claim 20, especially, "retrieve a first object that defines characteristics of the first report, the first object including a first query language instruction operable to retrieve a first data set from a database, the first query language instruction also including a linking instruction that specifies a linking relationship between at least a portion of the first data set and the second report, the first object further specifying a first report template to which the first data set is operable to be bound"

Tabb et al. (USP 5603025) do not teach "the first query language instruction also including a linking instruction that specifies a linking relationship between at least a portion of the first data set and the second report, the first object further specifying a first report template to which the first data set is operable to be bound" as taught in fig. 5 by the Applicant wherein the query statement 552 specifies a linking relationship 564.

The prior art of record does not teach the combination of limitations in the independent claim 22, especially, "a result set handling module operable to identify drill-down-report a linking identifier in the result set; and an event handling module operable to retrieve, in response to user requests, report pattern objects corresponding to drill-down reports specified in the linking identifier of the result set" wherein the linking identifier, items 650-660 in fig. 6, will be able to display drill-down report in fig. 7.

Dependent claims 21, 23-27 incorporate the listed limitations by reference and contain limitations that further distinguish over the art of record. For these reasons, claims 21, 23-27, are considered allowable over the art of record.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LINH BLACK whose telephone number is 571-272-4106. The examiner can normally be reached on 8am - 5pm.
